First Office Action on the Merits

Election/Restrictions

1. Applicant's election with traverse of Group II in the reply filed on May 15, 2006 is acknowledged. The traversal is on the ground(s) that Group III is drawn to a method of making the conjugates of Group I or the complexes of Group II. This is not found persuasive because neither Group III nor Group IV recites the specific conjugates or complexes of Groups I or II. Therefore, Groups III and IV are independent and distinct from Groups I and II.

The requirement is still deemed proper and is therefore made **FINAL**.

Note: The examiner has combined Groups I and II.

2. Claims 1-40 are allowable. The restriction requirement between Groups I and II, as set forth in the Office action mailed on April 13, 2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 41-52, directed to process of making or the delivering of a nucleic acid remain withdrawn from further consideration because they do not all require all the limitations of an allowable generic linking claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim(s) presented in a continuation or divisional application include

Art Unit: 1617

all the limitations of a claim that is allowable in the present application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 1-40 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or suggest the claimed conjugates/complexes. For example, unlike the claimed conjugates, the closest prior art conjugates lack a terminal hydroxyl group (see for example, US patents 5,783,565 and 5,935,936). The prior art does not provide motivation to modify the prior art conjugates in order to obtain the presently claimed conjugates.
